CARBOHYDRATE
RESEARCH

Subject index

- N-Acetylhexosaminidase**
Analysis of *N*-acetyl-chitooligosaccharides by the Iatroscan TLC/FID system 77
- Acidic fibroblast growth factor**
A comparison of the conformation of sucrose octasulfate, free and bound to acidic fibroblast growth factor 115
- Allomorph stability**
Crystalline cellulose 1α and 1β studied by molecular dynamics simulation 207
- Amadori compounds**
The detection of some dicarbonyl intermediates arising from the degradation of Amadori compounds (the Maillard reaction) 171
- Ant-egg lectins**
Isolation, purification and characterization of three lectins from ant eggs (*Oecophylla smaragdina*) 63
- O-Antigen**
Structure of the O-specific polysaccharide of *Hafnia alvei* 1204 containing 3,6-dideoxy-3-formamido-D-glucose 187
- Antiherpes activity**
Structural analysis of antiviral sulfated α -D-(1 → 3)-linked mannans 179
- Aspergillus**
Structural investigation of cell-wall polysaccharides from *Neosartorya*: relationships with their putative anamorphs of *Aspergillus* 255
- Azido sugars**
Synthesis of sugar ureas via phosphinimines 99
- Biological property**
Isolation, purification and characterization of three lectins from ant eggs (*Oecophylla smaragdina*) 63
- Bis(tributyltin) oxide**
A practical synthesis of methyl 4-*O*-methyl- α -D-glucopyranosiduronic acid 249
- Capsular polysaccharide**
Structural studies of the capsular polysaccharide from *Klebsiella* type 7 53
- Carbon dioxide**
Synthesis of sugar ureas via phosphinimines 99
- Cationic salts**
Purification of commercial gellan to monovalent cation salts results in acute modification of solution and gel-forming properties 225
- ^{13}C CP/MAS NMR-spectra**
Crystalline cellulose 1α and 1β studied by molecular dynamics simulation 207
- Cellulose acetate**
Determination of substituent distribution in cellulose acetate by means of a ^{13}C NMR study on its propanoated derivative 83
- Cellulose I**
Crystalline cellulose 1α and 1β studied by molecular dynamics simulation 207
- Chitin**
Chitin deacetylation by enzymatic means: monitoring of deacetylation processes 235
- Chitinase**
Analysis of *N*-acetyl-chitooligosaccharides by the Iatroscan TLC/FID system 77
- Chitin deacetylase**
Chitin deacetylation by enzymatic means: monitoring of deacetylation processes 235
- Chitin deacetylation**
Chitin deacetylation by enzymatic means: monitoring of deacetylation processes 235
- Chitooligosaccharides**
Analysis of *N*-acetyl-chitooligosaccharides by the Iatroscan TLC/FID system 77
- Chitosan**
Chitin deacetylation by enzymatic means: monitoring of deacetylation processes 235
- Collision-induced dissociation (CID)**
Structural analysis of mono- and bis-sulfated glycosphingolipids by negative liquid sec-

- ondary ion mass spectrometry with high- and low-energy collision-induced dissociation 41
- Conformation**
- A reinvestigation towards the conformation of methyl α -D-mannopyranosyl-(1 \rightarrow 6)- α -D-mannopyranoside by a combined ROE and molecular dynamics analysis 11
 - A comparison of the conformation of sucrose octasulfate, free and bound to acidic fibroblast growth factor 115
- Conformations**
- A theoretical study of D-glucose, D-galactose, and parent molecules: solvent effect on conformational stabilities and rotational motions of exocyclic groups 129
- β -Cyclodextrin**
- Solubility and primary nucleation of cyclomaltoheptaose 243
- Cyclomaltoheptaose**
- Solubility and primary nucleation of cyclomaltoheptaose 243
- Dextran**
- Preparative separation of oligosaccharides from κ -carrageenan, sodium hyaluronate, and dextran by Superdex™ 30 prep. grade 71
- Dicarbonyl sugars**
- The detection of some dicarbonyl intermediates arising from the degradation of Amadori compounds (the Maillard reaction) 171
- Diffusion**
- Diffusion in maltose-water mixtures at temperatures close to the glass transition 147
- Diglucosylamines**
- Inhibitory effect of diglucosylamines on two β -glucosidases 109
- ECA structure**
- Determination by NMR spectroscopy of the structure and conformational features of the enterobacterial common antigen isolated from *Escherichia coli* 157
- Enterobacteria**
- Structure of the O-specific polysaccharide of *Hafnia alvei* 1204 containing 3,6-dideoxy-3-formamido-D-glucose 187
- Enterobacterial common antigen (ECA)**
- Determination by NMR spectroscopy of the structure and conformational features of the enterobacterial common antigen isolated from *Escherichia coli* 157
- Enzyme assay**
- Sequential structure by ^1H NMR as a direct assay for pectinesterase activity 93
- ESIMS/MS**
- Structural elucidation of underivatized gangliosides by electrospray-ionization tandem mass spectrometry (ESIMS/MS) 27
- Formyl group**
- Structure of the O-specific polysaccharide of *Hafnia alvei* 1204 containing 3,6-dideoxy-3-formamido-D-glucose 187
- Fungi**
- Structural investigation of cell-wall polysaccharides from *Neosartorya*: relationships with their putative anamorphs of *Aspergillus* 255
- Gangliosides**
- Structural elucidation of underivatized gangliosides by electrospray-ionization tandem mass spectrometry (ESIMS/MS) 27
- Gel filtration chromatography**
- Preparative separation of oligosaccharides from κ -carrageenan, sodium hyaluronate, and dextran by Superdex™ 30 prep. grade 71
- Gel formation**
- Purification of commercial gellan to monovalent cation salts results in acute modification of solution and gel-forming properties 225
- Gel-Gro®**
- Purification of commercial gellan to monovalent cation salts results in acute modification of solution and gel-forming properties 225
- Gellan**
- Purification of commercial gellan to monovalent cation salts results in acute modification of solution and gel-forming properties 225
- Glass transition**
- Diffusion in maltose-water mixtures at temperatures close to the glass transition 147
- β -Glucosidase**
- Inhibitory effect of diglucosylamines on two β -glucosidases 109
- Glucuronoxylans**
- A practical synthesis of methyl 4-O-methyl- α -D-glucopyranosiduronic acid 249
- α -(1 \rightarrow 6) Glycosidic linkage**
- A reinvestigation towards the conformation of methyl α -D-mannopyranosyl-(1 \rightarrow 6)- α -D-mannopyranoside by a combined ROE and molecular dynamics analysis 11
- Glycosphingolipids**
- Structural analysis of mono- and bis-sulfated glycosphingolipids by negative liquid secondary ion mass spectrometry with high- and low-energy collision-induced dissociation 41
- Glycosylamines**
- Inhibitory effect of diglucosylamines on two β -glucosidases 109

- Hydrogen bond**
 A theoretical study of D-glucose, D-galactose, and parent molecules: solvent effect on conformational stabilities and rotational motions of exocyclic groups 129
- Hydrogen bonding**
 Crystalline cellulose I α and I β studied by molecular dynamics simulation 207
- Inhibition**
 Inhibitory effect of diglucosylamines on two β -glucosidases 109
- κ -carrageenan**
 Preparative separation of oligosaccharides from κ -carrageenan, sodium hyaluronate, and dextran by Superdex™ 30 prep. grade 71
- Klebsiella**
 Structural studies of the capsular polysaccharide from *Klebsiella* type 7 53
- α -(1 → 3)-Linked mannans**
 Structural analysis of antiviral sulfated α -D-(1 → 3)-linked mannans 179
- α -(1 → 3)-Linked mannans, sulfated**
 Structural analysis of antiviral sulfated α -D-(1 → 3)-linked mannans 179
- Lipopolysaccharide**
 Structure of the O-specific polysaccharide of *Hafnia alvei* 1204 containing 3,6-dideoxy-3-formamido-D-glucose 187
- Liquid SIMS**
 Structural analysis of mono- and bis-sulfated glycosphingolipids by negative liquid secondary ion mass spectrometry with high- and low-energy collision-induced dissociation 41
- Maillard reaction**
 The detection of some dicarbonyl intermediates arising from the degradation of Amadori compounds (the Maillard reaction) 171
- Maltose**
 Diffusion in maltose–water mixtures at temperatures close to the glass transition 147
- Mannose**
 A reinvestigation towards the conformation of methyl α -D-mannopyranosyl-(1 → 6)- α -D-mannopyranoside by a combined ROE and molecular dynamics analysis 11
- Mass spectrometry**
 Structural analysis of mono- and bis-sulfated glycosphingolipids by negative liquid secondary ion mass spectrometry with high- and low-energy collision-induced dissociation 41
- Mass spectrometry, tandem, electrospray**
 Structural elucidation of underivatized gangliosides by electrospray-ionization tandem mass spectrometry (ESIMS/MS) 27
- Methyl 4-O-methyl- α -D-glucopyranosiduronic acid**
 A practical synthesis of methyl 4-O-methyl- α -D-glucopyranosiduronic acid 249
- Molecular dynamics**
 A reinvestigation towards the conformation of methyl α -D-mannopyranosyl-(1 → 6)- α -D-mannopyranoside by a combined ROE and molecular dynamics analysis 11
- Crystalline cellulose I α and I β** studied by molecular dynamics simulation 207
- Molecular weight**
 Isolation, purification and characterization of three lectins from ant eggs (*Oecophylla smaragdina*) 63
- Monosaccharides**
 A theoretical study of D-glucose, D-galactose, and parent molecules: solvent effect on conformational stabilities and rotational motions of exocyclic groups 129
- Mucor rouxii***
 Chitin deacetylation by enzymatic means: monitoring of deacetylation processes 235
- Neosartorya***
 Structural investigation of cell-wall polysaccharides from *Neosartorya*: relationships with their putative anamorphs of *Aspergillus* 255
- NMR**
 Sequential structure by 1 H NMR as a direct assay for pectinesterase activity 93
- NMR of ECA**
 Determination by NMR spectroscopy of the structure and conformational features of the enterobacterial common antigen isolated from *Escherichia coli* 157
- NMR spectroscopy**
 A reinvestigation towards the conformation of methyl α -D-mannopyranosyl-(1 → 6)- α -D-mannopyranoside by a combined ROE and molecular dynamics analysis 11
- Structure of the O-specific polysaccharide of *Hafnia alvei* 1204** containing 3,6-dideoxy-3-formamido-D-glucose 187
- Structural investigation of cell-wall polysaccharides from *Neosartorya***: relationships with their putative anamorphs of *Aspergillus* 255
- Nucleation**
 Solubility and primary nucleation of cyclomaltoheptaose 243

Oligosaccharide

Preparative separation of oligosaccharides from κ -carrageenan, sodium hyaluronate, and dextran by Superdex™ 30 prep. grade 71

Pectinesterase

Sequential structure by ^1H NMR as a direct assay for pectinesterase activity 93

Phytigel®

Purification of commercial gellan to monovalent cation salts results in acute modification of solution and gel-forming properties 225

Polygalacturonic acid

Sequential structure by ^1H NMR as a direct assay for pectinesterase activity 93

Polysaccharides

Structural investigation of cell-wall polysaccharides from *Neosartorya*: relationships with their putative anamorphs of *Aspergillus* 255

Propanoated derivative

Determination of substituent distribution in cellulose acetate by means of a ^{13}C NMR study on its propanoated derivative 83

Secondary amines

Synthesis of sugar ureas via phosphinimines 99

Selective oxidation

A practical synthesis of methyl 4-*O*-methyl- α -D-glucopyranosiduronic acid 249

Sequential structure

Sequential structure by ^1H NMR as a direct assay for pectinesterase activity 93

Sodium hyaluronan

Preparative separation of oligosaccharides from κ -carrageenan, sodium hyaluronate, and dextran by Superdex™ 30 prep. grade 71

Solubility

Solubility and primary nucleation of cyclomaltoheptaose 243

Solution

Purification of commercial gellan to monovalent cation salts results in acute modification of solution and gel-forming properties 225

Solvent effect

A theoretical study of D-glucose, D-galactose, and parent molecules: solvent effect on conformational stabilities and rotational motions of exocyclic groups 129

Substituent distribution

Determination of substituent distribution in cellulose acetate by means of a ^{13}C NMR study on its propanoated derivative 83

Sub-unit structure

Isolation, purification and characterization of three lectins from ant eggs (*Oecophylla smaragdina*) 63

Sucrose octasulfate

A comparison of the conformation of sucrose octasulfate, free and bound to acidic fibroblast growth factor 115

Sugar conformation

Determination by NMR spectroscopy of the structure and conformational features of the enterobacterial common antigen isolated from *Escherichia coli* 157

Sugar phosphinimines

Synthesis of sugar ureas via phosphinimines 99

Sugar ureas

Synthesis of sugar ureas via phosphinimines 99

Sulfolipids

Structural analysis of mono- and bis-sulfated glycosphingolipids by negative liquid secondary ion mass spectrometry with high- and low-energy collision-induced dissociation 41

Tetrahydropyrans

A theoretical study of D-glucose, D-galactose, and parent molecules: solvent effect on conformational stabilities and rotational motions of exocyclic groups 129

TLC/FID

Analysis of *N*-acetyl-chitooligosaccharides by the latroscan TLC/FID system 77

Trichoderma

Inhibitory effect of diglucosylamines on two β -glucosidases 109

Water

Diffusion in maltose-water mixtures at temperatures close to the glass transition 147

 β -(1 → 2)-D-Xylose modified

Structural analysis of antiviral sulfated α -D-(1 → 3)-linked mannans 179
